

Strengthening your Eggs Before they Hatch.

## ABOUT US

Established in 1984, Shanti Foods is a well-known producer of Daily Edibles in the Indian state of Madhya Pradesh. Apart from daily food items, it also provides a wide range of Spices, Oils & healthy snacks. Aiming to make Madhya Pradesh a healthier and rich food supplied state. Shanti Foods has expanded its operations across the region, building different units to cater to various feed-based needs.

## PRESSING CHALLENGES

With large scale production and other operations, the staff at Shanti Foods spent considerable time in manual data entry. Furthermore, decision makers were unable to get Product specific reports to take timely decisions and cut costs, resulting in rising expenses.

- The client was using a non-tailored, standard ERP for all its operations.
- The standard ERP did not feature any customizable modules
- The client was unable to filter various data apart from generic reports.
- The current software was not scalable and could not be expanded.
- It also lacked automation and depended on manual processes.

## PROTONSHUB'S SOLUTION

Protonshub's ERP Development experts engaged with various departments and end-users at Shanti Foods. The requirements included a feed manufacturing and distribution module to manage purchase processes and the automation of automatic reversal entry based on PO, GRN & purchase bill party. The layer division module was also sought for the maintenance of production, daily feed, and their production entries.

## SOLUTION OUTCOME

Based on the requirements, Protonshub was chosen as the ideal ERP Development Partner equipped to design following modules:

Sales, Purchases, Inventory, Finance, Production, Quality Assurance, Payroll, Feed, Layer, Distribution of Edibles, Owleries and Medicine (Wholesale & Retail).

## AFTER THE DEPLOYMENT:

- The client was able to access quick business insights through the ERP.
- Separate reports could be generated for the Feed and Layer modules.
- Manual practices were replaced with automation driven processes.
- MIS, Decision Support System & Control Mechanisms were configured.
